

# LAPPING AND GRINDING

## Operation.

Machining performed to achieve smooth and accurate surface for different application such as valve seats (flat, conical, ...), seal seat, or, in general, surfaces which require very low roughness in term of Ra (or AARH).

## Working Range.

Different for any kind of application and to be defined matching dimension-roughness.

## Customization.

Available for engineering of dedicated solution.

24/7 | Worldwide  
Site Machining

We perform on-site machining and take care of all those interventions aimed at the restoring of the geometry of mechanical components. In addition to being first-users of a wide range of machine tools, we are resellers and consultants too. Our experience is mostly related to the Oil & Gas Industry, but we easily manage to apply our services in any kind of industry.
