

# SERVICE PACK LASER TRAKER

#### Operation.

Laser tracker is high technological measurement system born to check dimension and tolerance.

System is equipped by CAD software connected "real time" to make any kind of geometrical check.

#### Add-on.

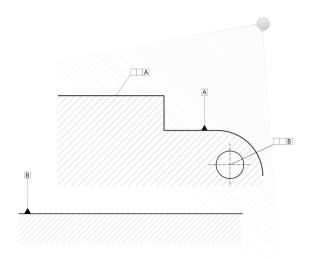

Feature to compare nominal 3D drawing to real measured. Possibility to assist portable machine tools in set up stage and check of results.

## **Working Range.**

Up to 80mt from laser emitter (precision related to distance)

### **Customization.**

Available for kind of probe and anchor system.

NOTE		

# 24/7 | Worldwide Site Machining

We perform on-site machining and take care of all those interventions aimed at the restoring of the geometry of mechanical components. In addition to being first-users of a wide range of machine tools, we are resellers and consultants too. Our experience is mostly related to the Oil & Gas Industry, but we easily manage to apply our services in any kind of industry.
