

RIMOZIONE TIRANTI

Operation.

Typical problem of mechanical coupling with stud bolt seized can be solved only by destruction of stud, without any damage to threaded hole.

Destruction can be carried out by mechanical progressive drilling, or by spark erosion (EDM).

Add-on.

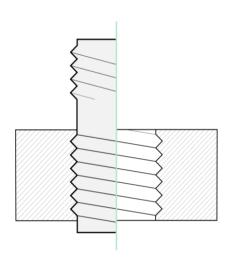

NC feed applied to reach high precision and low execution time.

Working Range.

No limit by progressive cut.

Customization.

Available for anchor / positioning system and shape of $\operatorname{cut}\nolimits.$

NOTE			

24/7 | Worldwide Site Machining

We perform on-site machining and take care of all those interventions aimed at the restoring of the geometry of mechanical components. In addition to being first-users of a wide range of machine tools, we are resellers and consultants too. Our experience is mostly related to the Oil & Gas Industry, but we easily manage to apply our services in any kind of industry.
